Use the Eye Reviver to delicately spread the eye cream. Put a small amount of pressure and gently massage the skin.

Target eye area

Your eyes are the main focus of your face. They also show when you're tired and are the first place you're likely to get wrinkles. That's because the skin around your eyes is much thinner than the rest of your face. Eye creams have lighter textures, are fragrance free and contain just the right amount of active ingredients to target the unique needs of the area like lines, puffiness and dark circles. In NovAge range you can find a variety of eye creams and pick the one that best addresses your skin's specific demands.

My lips look gorgeous again!

”

Only with this product my lips came back from dryness! I had tried many products and cosmetics, but the look and texture of my lips did not change... With this balm my lips regained their healthy look! I use it alone or as a primer before applying lipstick.
