Essential substance that our bodies lack

Summer's slowly coming to an end, but that doesn't mean you can't cultivate all the good habits you've picked up! However, if you're coming back from seaside holidays, you might expect that your fish intake will probably decrease. How can you still get the benefits of seafood diet?

Omega 3

As our bodies do not produce Omega-3 fatty acids, they must be obtained from food sources or from supplements. Wellness by Oriflame Omega 3 provides you with the essential fatty acids that your body needs!

Rich in essential fatty acid EPA & DHA, Omega 3 is beneficial for supporting and maintaining the proper function of your brain**, heart*, and eyes**.

*The beneficial effect is obtained with a daily intake of 250 mg of EPA and DHA **The beneficial effect is obtained with a daily intake of 250 mg of DHA

**The beneficial effect is obtained with a daily intake of 250 mg of DHA

For our Omega 3 supplements, we only use pure, natural, pharmaceutical grade fish oil, certified sustainable by the association **Friend of the Sea (FOS)** - an independent organisation with a mission to conserve the marine environment while ensuring sustainable fish stocks.

Take 2 capsules per day with a meal.
