What causes hyperpigmentation?

Hyperpigmentation and skin tone discolourations are commonly caused by oxidative stress in the skin, which can be triggered by multiple factors like exposure to UV and pollution, hormonal imbalance, and lifestyle factors such as poor diet and stress. Oxidative stress damages and disrupts many different skin functions, including melanin production - the skin pigment responsible for defining skin tone. This results in patchy tones on skin - typically reddish, yellowish or dull/greyish.

NovAge Brilliance technologies and ingredients help improve the appearance of hyperpigmentation and other skin tone discolourations. Skin Tone Regulator Technology helps control melanin production and restore its balance. Ribwort Plant Stem Cell Extract helps counteract skin discolourations. Aqua-Bank Moisture Strategy gives the complexion a translucent, luminous quality.

Two steps to glam!

We know you love to look beautiful and glamorous every day. But like any true diva, you are always in a rush! Let us give you some simple steps (and tricks!) to get a total glam look, even when you are short on time. Because every star has her secret to shine!

1 DEFINE

The trick is using the eye pencil not only to frame your eyes, but also to **define your lashes**. Just rim the upper lash line!

Beauty Hack!

To add that **foxy-eye** touch, apply mascara in an angled direction, towards the outer corner of your eye. This will create the illusion of an extra-long shape!

RED CARPET LASHES

2 ENHANCE

Here comes the magic: add **supreme volume and length** to your lashes! The **intense black pigments** will make your eyes -and look- simply unforgettable!

TWO STEPS TO GLAM!

VOLCANIC MINERALS
Composed of five essential minerals and sourced directly from Mount Etna, the Volcanic Minerals encourage skin to flourish and protect against ageing.

2 GLOW!
Isolate pearls of your choice to customise your glow and invoke a luminous aura on your skin!

HOW TO USE

Swirl a brush over the pearls and sweep over cheekbones, décolleté and other areas you wish to highlight.

Beauty Hack!

The key for a natural-looking, still extra-glamorous dewy skin is to apply highlighter to the right spots. Think the areas that the sun would naturally hit!

1 COVER

Give your skin a perfect finish with a full-coverage, long-lasting foundation. With SPF 15 to protect it from premature ageing!

1 Choose organic ingredients

Processed food with artificial sweeteners and preservatives may be more popular, but is less dense in nutrients. When planning your meals, rather pick organic!

2 Enhance your meals

Natural Balance Soups are not only a nutritious snack themselves. They are also a perfect base for customising your own meal! Pick your favourite toppings and get creative!

What do they contain?

Their low-fat, high-protein formula features three vegetarian protein sources that contribute to the maintenance of muscle mass: pea, soy and potato.

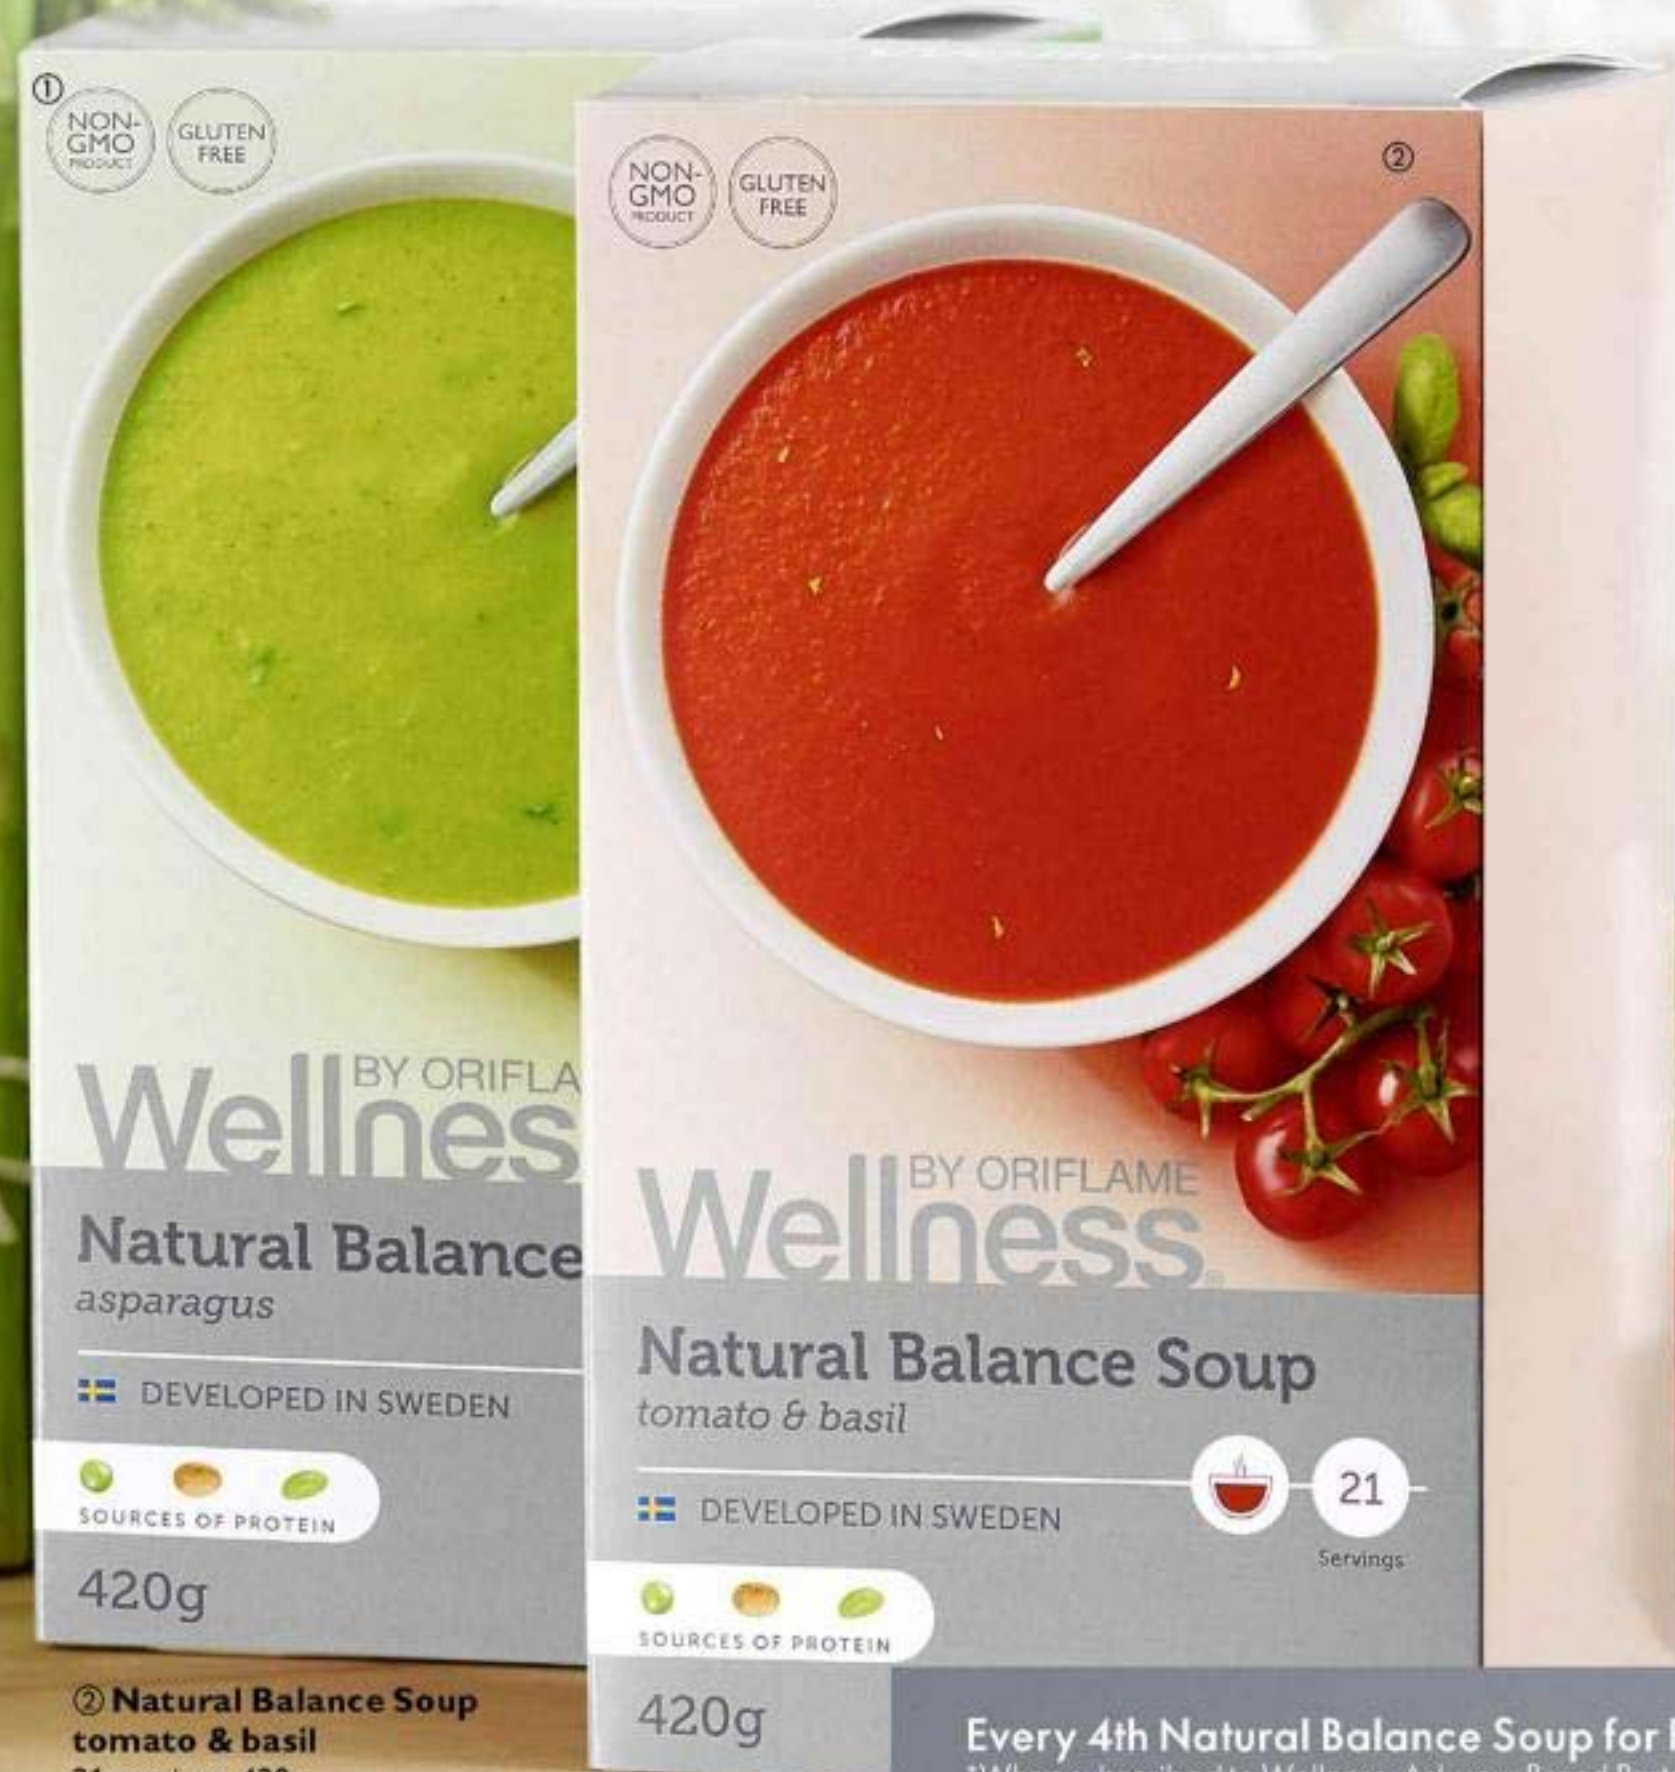

How to prepare them?

Mix one scoop of powder with 150-200ml of boiling water and stir until smooth. Alternatively, mix the powder and cold water in a pan and bring to the boil on the stove.

Nutritious, easy... and delicious!

Natural Balance Soups provide an ideal mix of umami flavours and nutritious, plant-based ingredients with each protein-fuelled serving. A quick meal as easy as opening a pack of candy but much more filling and satisfying!
