EXPERT ADVICE

"UV exposure ages the skin more than any other factor – always use SPF, even when it's cloudy."

* Biotin contributes to the maintenance of normal hair and skin. Vitamin C contributes to normal collagen formation for the normal function of skin, to the protection of cells from oxidative stress, and increases iron absorption. Iron has a role in the process of cell division. Selenium contributes to the maintenance of normal hair and nails, and to the protection of cells from oxidative stress. Zinc contributes to normal protein synthesis and the maintenance of normal skin, hair and nails.
