Frequently asked question:

Why is calcium important?

Calcium is essential for supporting bone growth and strengthening teeth. It also plays a regulatory role in several parts of the body such as enabling the blood to clot, muscles to contract and the heart to beat. Many studies have shown that calcium combined with vitamin D increases bone mineral density and reduces fracture risk. In fact, calcium can't be absorbed without the presence of vitamin D. That's why we combined them both in our Wellness Marine Calcium & Vitamin D supplement!

"The Meal Replacement Shake is a tasty and healthy meal that can replace unhealthy ones with a controlled number of calories. It is a high-quality formulation to deliver results. The plant-based ingredients (pea and faba bean) are inspired by the principles of a Nordic diet, known for its health attributes."

Frequently asked question:

What's the difference between the Meal Replacement and the Natural Balance Shake?

The Meal Replacement for Weight Control is intended to serve as a meal. It offers more protein, carbohydrates, dietary fibre, fats and calories per serving than the Natural Balance Shake but is lower in calories than an actual meal. It also provides essential vitamins and minerals, which the Natural Balance Shakes do not provide. The Natural Balance Shakes are not formulated nor intended to be eaten instead of a meal. They are easy, tasty and convenient snacks that are intended to add protein and dietary fibre to your diet.
